Items for the Daily Log - 21 August 1953 - Legislative Counsel

25X1A 1. Mr. Sheldon informed me that the briefing on the Joint Committee on Congress on Atomic Energy would be given by General Cabell and Mr. [] at four o'clock today. AEC has ducked
* this one and will not appear. Only the two mentioned above will go from here.

25X1A 2. Mr. [] told me that GPO has made a tentative approach in connection with McCarthy's hearings to try to pass the ball to us in the event McCarthy goes into the security procedures
25X1A * of the South Building plant. Mr. [] and I agreed that if GPO tries to pursue this line we should tell them that since they have taken over the administration of the plant, they are fully responsible for it in all aspects, and if questioned on security procedures, they must handle the matter although since we and AEC handle the clearance, we will give them such information ^{reference} as may be pertinent.

Lawrence R. Houston
General Counsel
